

Environmental

We are pleased to share a sustainability update for the Centre and to highlight the positive progress achieved over the last reporting year (April 2025 – March 2026).

- The Centre achieved a much improved overall recycling rate of **75%** during the reporting period.
- We are also proud to confirm that the Strand Shopping Centre is now operating with **0% waste sent to landfill**.
- Energy performance remained within target this year, with significant reductions in both gas and water consumption. These improvements have been strongly influenced by the ongoing redevelopment works, including the removal of the public toilet facilities, and we anticipate further changes and efficiencies over the coming year as the project progresses.
- In addition, all communal electricity supplies across the Centre are sourced from **100% REGO-backed renewable energy**.

We would like to thank all occupiers for their continued support and cooperation in helping us improve the environmental performance of the Centre. Working together remains key to achieving our ongoing sustainability objectives.

Events

After receiving great feedback on our events programme last year, we are delighted to confirm that we will continue to provide a wide range of free family entertainment and activities throughout the school holidays this year.

Our next event will take place on **Wednesday 27 May** and will feature a **Star Wars-theme**, perfectly timed to coincide with the upcoming release of *The Mandalorian & Grogu*.

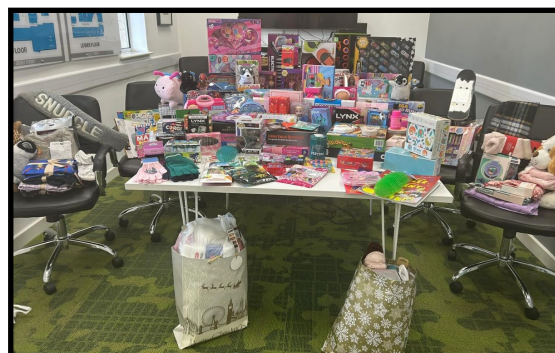

Further event information and updates will be shared with occupiers in advance of each event as the year progresses.
